DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by the Applicant's Prior Art (APA). On page 3 of the specification Applicant discloses a prior art device in Japanese Utility Model Publication No. Hei 5-37532. The prior art device comprises a voltage supply device (main power source, sub-power source) that supplies power to the entire power amplifier in a second mode and supplies power to a sound level controller (a unit involved in setting the compensation functions and adjustment values) in a first mode. Under a broad interpretation, the device has means for setting the voltage supply device to a first mode when the device power is turned on and means for setting the voltage supply device to a second mode when the device power is turned on after setting on/off operation of compensation functions (sound level control) in a first mode and turning power off. The means for setting the voltage supply device is the remote control. (Although when the voltage supply device is turned on after the compensation functions are done and the power amplifier may consume a large amount of power when not in a standby mode, that does not preclude the means to switch back to the standby mode, which would qualify as the second mode.)

Allowable Subject Matter

Art Unit: 2644

any intervening claims.

Claims 2, 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and

Claims 4-10 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W. Isen can be reached on (703) 305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
